#### **DETAILED ACTION**

This Office Action is responsive to the Amendment After Final filed on November 11, 2006. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-15, 17, 18, 20-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Murphy et al., U.S. Pat. No. 6,059,943, in view of Koslow, U.S. Pat. No. 5,147,722.

Rejection of claims 1-15, 17, 18, 20-26 drawn to a polymeric membrane.

Murphy et al., teach a substantially air impermeable polymeric membrane comprising a polymeric sheet (col. 9, lines 34-36) comprising polymer and having a porous structure (col. 9, lines 9-12), the sheet having distributed in the polymer: inorganic particulate (col. 8, lines 47-51), metal (col. 8, lines 52-58), organic polymer (col. 8, lines 58-62), or a combination (col. 8, lines 47-62), and the porous structure is at least partially filled with an ion-exchange particles to provide ionic conductance (claim 1). It teaches the sheet has precious metal, or silica (col. 3, lines 1-9), or titania (claim 4), or carbon (col. 13, lines 65-67 and col. 14, lines 1-3), or platinum distributed therein

Art Unit: 1745

(col. 14, lines 1-3). It teaches the polymeric sheet is porous expanded PTFE (col. 12, lines 1-10). It teaches membrane is disposed between two fuel cell electrodes (col. 13, lines 64-67 and col. 14, lines 1-6). It teaches porous structure is filled with metal salts (col. 12, lines 42-55). It teaches the ion-exchange membrane is fluorinated (col. 8, lines 47-67 and col. 9, lines 1-8). It teaches the polymer has a cross-linked structure (Fig. 2 and 6).

Koslow teaches a polymeric membrane comprising ion-exchange resin (col. 25, lines 15-35) wherein the polymeric sheet has silica or fumed silica distributed therein (col. 16, lines 65-67 and col. 17, lines 1-7).

Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to insert the teachings of Koslow into the teachings of Rusch et al., because Koslow teaches that the addition of fumed silica can alter the stiffness of the membrane and improve the strength of the structure. With respect to the sheet thickness and the porosity, it would have been obvious to one having ordinary skill in the art at the time the invention was made to choose an optimum thickness and porosity, since it has been held that discovering the optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F. 2d 272, 205 USPQ 215 (CCPA 1980).

Art Unit: 1745

### Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bahar et al., U.S. Pat. No. 5,599,614, teach a composite membrane including an ion exchange resin, fibrils.

## Response to Arguments

4. Applicant's arguments with respect to the pending claims have been considered but are most in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Angela J. Martin whose telephone number is 571-272-1288. The examiner can normally be reached on Monday-Friday from 9:00 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached on 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
